Research Center for
Software Technology and Management

DECEMBER 2014

ABOUT SOFTAM

The Research Center for Software Technology and Management (Softam) is positioned to be in the research stream of the rapidly changing computing technology. Consisting of 14 research labs concentrating in various areas of computing research, Softam looked into the whole spectrum of research, beginning with ideas experimentation, creating the technology, deployment and studying the impact of the results in the real world.

Whether they are technical users, business users, young users or users with other special needs, at Softam users and users' experience are central to its research.

Softam is driven by three research groups and one research unit as follows:

- Programming and Software Technology Research Group led by Prof. Dr. Abdullah Mohd Zin
- Strategic Information Systems Research Group led by Assoc. Prof. Dr. Kamsuriah Ahmad
- Multimedia Software and Usability Research Group led by Assoc. Prof. Dr Nor Azan Mat Zin
- Service Science Research Unit led by Assoc. Prof. Dr. Muriati Mukhtar

Softam has more than 100 postgraduate students, and most of the research activities are funded by Malaysian Ministry of Higher Education, Ministry of Science, Technology and Innovation as well as the Research University Grant Scheme.

We believe that ideas should be welcomed, experimented and share.

This is described in our mission:

"To create software innovation and to discover a new knowledge as well as to be at a frontier of knowledge in the area of software technology and management through consultation, technology training and research steered by UKM philosophy"

Inspired by Softam vision:

"To be recognized as a center of excellence in software technology and management"

We strive hard to fulfill the following objectives:

- To provide facilities and infrastructure to carry out research in software technology and management
- To carry out research for the enrichment of knowledge in software technology and management
- To develop experts in the field of software technology and management through teaching and research.
- To manage the process of knowledge transfer through training and consultation.
- To develop various type of software technology that can aid in software development activity.
- To generate intellectual property in the area of software technology and management that has value for commercialization.
- To be a center of reference, training as well as technology transfer in the area of software technology and management in Malaysia.

Agent Mediated E-Commerce & Service Science Research Lab

Laboratory Outline

Agent-based Technology could play a vital role in delivering the required levels of autonomy, customization and sophistication in the way e-commerce is conducted. We aim at developing agent-based framework, system architecture, economic model, business model, negotiation protocols, security protocols, and addressing legal and sharia compliancy issues in e-commerce system.

Service Science was first introduced in 2004 and has attracted much attention both from academia and industries. With the advances in information and networking technologies, the capacity and the scope of services have been expanded beyond their traditional realm and require systematic and rigorous study.

Therefore, the Agent Mediated E-Commerce & Service Science Research welcome a wide range of students, from those two areas.

Principal Researchers

Assoc. Prof. Dr. Muriati Mukhtar (Leader)

Cyber Security & Software Testing Research Lab

Laboratory Outline

In cyber security field, we explore three areas of research: cryptography, network security, security management and human aspect related to security. In cryptography, the works are further divided into two sub areas: cryptosystems and trusted computing. Whilst in digital forensic field, we interested in analysing image file, and improving the file carving technique.

Meanwhile, the software testing area covers the research related to testing using test cases, and software verification deal with research related to the use of formal methods.

Current Research

- Security Verification Framework For Mobile OS
- Aplikasi Penyimpanan dan Pengesahan Sijil Kelayakan Atas Talian Bersekuriti Tinggi
- Formal Verification of seMeja Interaction
- Spiking Neural P Systems to Enhance Intrusion Detection Systems for Network Security Management
- Aplikasi Konsep Scaffolding dalam Rekabentuk Antaramuka Alatan Pembangunan Pengaturcaraan di UKM
- Pemantapan Pengajaran dan Pembelajaran Untuk Kursus Analisa dan Rekabentuk Algoritma Dengan Peralatan Simulasi
- Pemantapan penggunaan peralatan simulasi melalui kajian kes untuk pengajaran dan pembelajaran berorientasikan pelajar untuk kursus analisa dan rekabentuk algoritma

Information Systems Research Lab

Laboratory Outline

We carry out research related to Information Systems management and development and Socio-technical issues surrounding them to support business process and solve business problems in various domains including healthcare, education and the public sector.

Major Research Area

Information Systems/ Health Informatics

- Evaluation, Adoption and Diffusion, Development
 - Management
 - » Business/IT alignment/fit
 - » Project Management
 - » Business Process Management
 - » IT governance
 - Cybernetics: Viable System Model

Collaborative Research: National Heart Institute, Ministry of Health

Current Research

- Sistem Ramuan Makanan Halal Berasaskan, HEJIM.
 - A Model for Business-IT Alignment in Malaysian Public Universities.
 - Data Quality And Error Management In Health Information Systems: A Rigorous And Lean Approach To Evaluation.
 - A Semantic Approach to Collaborative Tagging in Medical Blogs.
 - The evaluation application of ontology based health information systems in Malaysian clinical practices

Principal Researchers

Assoc. Prof. Dr. Maryati Mohd Yusof (Leader)

Dr. Dian Indrayani Jambari

Ms. Hana Yasmein Ishak

Research Students

Distributed & Platform Technology Research Lab

Laboratory Outline

The emergence of grid and cloud computing has made distributed computing technology a hot research topic. It is well known that cloud has become a disruptive innovation which has transformed the way software is viewed. At DPTL we explore research opportunities ranging from parallel algorithms, cloud services for High Performance Computing (HPC), mobile-cloud applications, trusted computing and security issues in cloud.

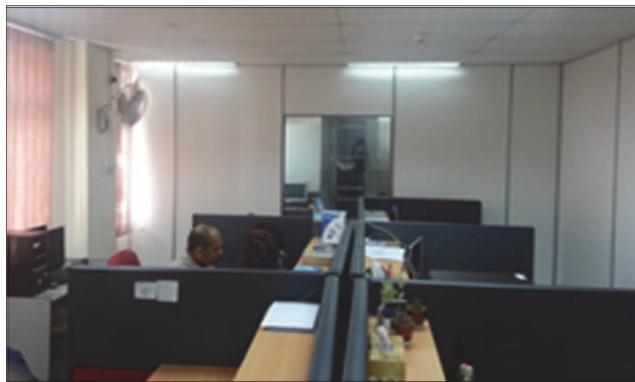

We are keen in providing HPC solutions for Engineering problems, Bioinformatics and Big Data analytics. Members of DPTL also aim to develop distributed solution frameworks and models for various research areas and SMEs. We also keen in trusted computing platform and security issues in cloud. One of our main goals in research is to utilize as many open source tools and libraries as possible.

Major Research Interest

- High performance computing, Parallel and distributed algorithms, Computational Science
- Mobile-cloud technology, Cloud services for Big Data, Open source tools for distributed computing, Performance model for parallel computation on WAN, Trusted computing, Security on cloud

Computing Resources

- Servers
 - » CPU:Intel Xeon® E5620 @2.4 GHz, RAM: 64 GB,HD: 1 TB,NIC: 2 Gigabit, 8 cores.
 - » CPU:Intel Xeon® E5620 @2.4 GHz, RAM:128 GB,HD: 12 TB,NIC: 2 Gigabit, 8 cores
- Cluster
 - » 16 nodes:CPU: Intel Core™ i3 M390 @2.67 GHz, RAM: 4 GB, HDD: 500 GB, NIC: Realtek Express Gigabit
- Lab PCs
 - » 200 nodes: AMD Athlon™ 64 X 2 Dual Core 5600 + CPU @ 2.91GHz , Intel(R) Core™ 2 Duo / Pentium Dual Core and Intel(R) Core™ 2, Quad + CPU Q8300 @ 2.50GHz, RAM: 1GB-4GB, HDD:200GB-400GB

Research Students

- Mahathir Rahmany, P54322.
- Shakeabubakor Alkhansa Alawi B, P59447. *Conceptual Framework to Improve Productivity of Research Student using Mobile Cloud Computing.*
- Reza Naghizadeh Majid, P62476. *On The Computational Performance of The Quadratic and Cubic Lucas Based Cryptosystem.*
- Marwan Ibrahim Ahmad Alshar`E , P50008. *Comparison on Secure Data and Secure Data Transition: Toward More Trusted Computing*
- Hussein Abd Alhaleem Hussein Alhroot, P50019. *Software Reverse Engineering.*
- Nur Husna Binti Azizul, P72258
- Ahamed Lebbe Sayeth Saabith, P68509.
- Kashif Abbasi, P75141.
- Mostafa Ghane, P75457.
- Ghassan Muslim Hassan Al-Saddi, P78330.

Current Research

- A Novel Plant Root-Based Evolutionary Algorithm To Solve Mobile Cloud Computing Workflow Scheduling Problem.
- Exploring Data Streams Association Rules Mining On Clouds
- Enhancing Secure Files Distribution Based on Digital Watermarking with Public Key Cryptosystems
- Developing a Problem-Based Visual Aspect-Oriented Programming Environment for Novice Programmers

Principal Researchers

Advanced Software Methodology & Programming Education Research Lab

Laboratory Outline

This laboratory focuses on developing new and advanced software development methodologies. We also carry out researches and activities related to teaching and learning of programming.

Research Focus

- Advance software development technologies
 - » Object-oriented methodology
 - » Aspect-oriented methodology
 - » Open source methodology
 - » Block-based methodology
 - » Service oriented methodology
 - » Agile methodology
- Programming Education Technology
 - » Programming education services on the cloud
 - » Tangible programming tools
 - » Programming aptitude/understanding
 - » Teaching/learning and assessment techniques
 - » Teaching/learning and assessment tools
 - » Competitive programming

Current Research

- Pembangunan Program Lonjakan Penyelidikan dan Perbitan Kumpulan Pengaturcaraan.
- Ensemble Mobile Platform For Innovative Digital Economy Environment - The Design And Implementation Of The BeeOS
- Modeling Tools to Support Membrane Computing Formalism for Network Applications
- A Framework For An Innovative Self-Managed Fuzzy Logic Risk-Based Intrusion Detection And Prevention System Strategy Risk-Based IDPS Strategy

Research Students

Learning Technology & HCI Research Lab

Laboratory Outline

The laboratory is to contribute to development of new knowledge and new solutions in learning technology in correlation with the users. The approach is interdisciplinary, and it draws upon learning theory and participatory methods from technology, information and HCI design. Research in this lab is based on the concept of user-driven innovation in order to bring user mental model and behaviour into design.

Research Focus

- Interfaces for collaborative, Persuasive, engagement, effective learning
- Design rules for interfaces
- Accessibility Model
- Digital library usability model
- Mobile learning user interface
- Culture-centered User Interface
- Usable annotation tools
- Multimedia Information Retrieval

Research Students

- Yuhanis Binti Omar, P47874. *Kajian Futuristik Portal Pendidikan Menyeluruh untuk Sekolah di Malaysia.*
- Shafinah Binti Kamarudin, P56204. *Pemodelan Sistem Pakar Mudah Alih untuk Pengurusan Penyakit bagi Tanaman Lada Hitam.*

Network & Communication Technology Research Lab

Laboratory Outline

We aim to be a leader in networking and we welcome students who desire to learn more about Networking, Information Technology, and Computer Science. At NCT lab we carry out research that are related to network such as IPv6, network installation, monitoring, and performance. We are also doing research on Virtual Lab and Mobile Ad Hoc Network (MANET). Other than that, we are actively doing research in android based mobile applications. Basically, two techniques that we used in this lab are simulation and testbed. Most of the researchers in NCT are using simulation tools such as MATLAB, OMNET, NS-2, OPNET, and Qualnet.

Current Research

- Optimizing Spectrum Assignment in Wireless Communications Through Dynamic Spectrum Allocation in Malaysia
- A Computational Intelligence Routing Protocol for Vehicular Ad Hoc Network
- A New QoS Routing Mechanism for Mobile Ad Hoc Wireless Network
- Makmal Elektronik Atas Talian (MEaT)
- Quality of Service: Multicasting in Mobile Ad Hoc Networks
- Adaptive Generic Algorithm Position-Based Routing Protocol For Mobile ad Hoc Network

Principal Researchers

Assoc. Prof. Dr. Rosilah Hassan (Leader)

Dr. Raed Ali Helal Alsaqour

Dr. Nor Effendy Othman

Research Students

- Faisal Elhadi M.Abdalla, P53575. *A Novel Adaptive on Demand Routing Protocol for Manets.*
- Saad Mohamed M.Adam, P53577.
- Nurul Halimatul Asmak Binti Ismail, P56218. *Slowpan Routing Protocol for Monitoring Greening Technology.*
- Bara Tariq Sharef, P62457. *A Computational Intelligence Prediction-Based Protocol for Vehicular Ad-Hoc Network.*
- Amjed Sid Ahmed Mohamed Sid Ahmed, P72755. *Enhancing Security for IPV6 Neighbor Discovery Protocol using Digital Signature.*
- Chin Chee Yoon, P76450
- Asrul Nizam Bin Asat, P76460.

Database Research Lab

Laboratory Outline

Database Research Laboratory focuses on both fundamental and advanced technologies in the database research area. The research projects are supported by the research grants which are principally conducted by the members as well as postgraduate research students (PhD and Master).

Mainly, the research is focusing on analyzing various types of data, where each one of these data come with its own concepts, semantics, data formats, and access methods. Now, most organizations are flooded with ever-growing heterogeneous data of all types: structured, semi structured and unstructured data. With these new sources, new types and the increased speed of data are thus contributing to the trend of Big Data.

Major Research Fields

- Database Technology and XML
- Database Constraints
- Schema and Data Integration
- Data and Process Modelling
- Business Intelligence
- Query Processing and Optimization
- Data Models
- Big Data
- Data Management
- Data Warehouse

Current Research

- Informatic Governance For Strategic Decision Making
- Schema Matching Using Lexical And Structural Similarity In Heterogeneous Schema Integration
- Architecture and Modelling of Environmental Quarry System Based on Integrated Data Object and Big Data Analytics
- Inovasi dalam Aplikasi Pembelajaran Berpusatkan Pelajar bagi Kursus Pengenalan Kepada Teknologi Maklumat di FTSM
- Mysta: A Cloud-Based Business Process HUB, ETP, Ibrahim Mohamed
- A New SDLC Methodology Based on Islamic Concept of Human Development Life Cycle

- Heterogenous Data Integration for Business Analytics in Big Data Using Clustering Techniques, ERGS, Kamsuriah Ahmad, 2013
- Development of Meta-Metric Evaluation Model Based on User Centricity Approach for Medical Application Systems, Uni-Indystri, Jamaiah Yahaya, 2013

Information Management Research Lab

Laboratory Outline

The Information Management (IM) Laboratory is one of the initiative of the SOFTAM Research Centre to support research, research training and teaching in records, information and knowledge management.

Records, information management and knowledge management is a broad concept that address the full range of processes by which the organisation deploys information and knowledge. These involve the creation, acquisition, dissemination, use and preservation of records, information and knowledge in the organisation. The laboratory aims to support and strengthen research and education in the scientific areas of records, information and knowledge management. More specifically, the main targets of the laboratory are:

- Research and development of new methods and innovative applications in the framework of records, information and knowledge management
- The development of research infrastructure
- The participation in national funded research projects
- Educational activities at a graduate level
- Application and services such as: database production; organisation of documentation and information service; design of data and knowledge-based information systems; design of information retrieval systems; applications in the areas of electronic government, health, cultural heritage, e-commerce.

Research in records, information and knowledge management is driven by a very practical and very common problem revolving around information overload, unorganized and undermanaged information.

The IM laboratory conducts both basic and applied research in support of concepts, methodologies and software tools for the management of records, information and knowledge. Much of our research centres around Model-semantic models, conceptual models, ontologies, models of intentional actors and the relationship between them. In order to achieve the aforementioned goals, the laboratory promotes collaboration with higher education establishments and research institutes, as well as research groups in Malaysia and abroad.

Games Research Lab

Laboratory Outline

We carry out research related to digital game; game development method, games design, game interface and game system framework in addition to animation, simulation and Virtual Reality applications in multimedia information systems.

Research Focus

- Game design which include natural user interface games, edutainment and serious games design and evaluation, game development methods, culture in game interface design, game design for cognitive rehabilitation and character recognition for feedback engine in serious game.
- Multimedia Applications/systems which include the study of design and application of animation; virtual reality; simulation, and usability of multimedia systems.

Strategic Planning & Management Research Lab

Laboratory Outline

The Strategic Planning and Management (SPM) Laboratory supports research and education activities concerning information/software systems as a strategic tool to achieve organisational vision and mission.

The laboratory aims to produce high quality research outputs that focus on strategic and tactical management theories in solving practical ICT problems and challenges. This includes the formulation of ICT strategies in developing and maintaining systems, abstraction of systems design and assessment of ICT products. The research covers both theoretical and empirical perspectives.

Current Research Projects

- ICT strategic planning
- Software development
 - » Requirements engineering
 - » High level design
 - System architecture, user interface design
- E-Government
- Software management
 - » Software certification
 - » Change management
 - » Project management
 - » Risk management
- E-Commerce

Research Project

- *Rangka Kerja Interoperabiliti sistem Kerajaan Elektronik: Kajian Kes Sistem Maklumat UKM*
- A Suite of Risk Metrics for Software Requirements Change Impact Analysis
- *Applikasi Konsep Scaffolding dalam Rekabentuk Antaramuka Alatan Pembangunan Pengaturcaraan di UKM,*
- *Penggunaan Kaedah Kes dalam Pengajaran Kejuruteraan Perisian: Pembangunan Kes dan Penilaian Keberkesanan*
- A Multi-Criteria Risk Assessment Model for Requirements Change
- A Systematic Requirements Prioritisation Process Model for Agile Development: The Adoption of 6S Approach.,
- Multicultural Interface Design Framework for Malaysian E-Government Services Based on Culture Centred Design (CCD) Approach

Principal Researchers

Assoc. Prof. Dr. Rozilawati Razali (Leader)

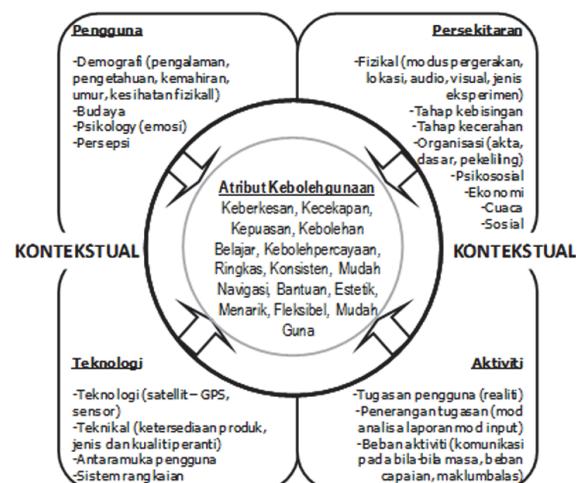

Assoc. Prof. Dr. Dalbir Singh

Location of Lab

Level 1, Block H, FTSM.

Contact

Email : rozilawati@ukm.edu.my

Researchers

Prof. Dr. Abdullah Mohd Zin

Research Interests:

Computer Science & Programming Education, Software Tools & Advanced Software Development Methodology, Formal Method, Network & Mobile Applications

Email : amzftsm@ukm.edu.

Prof. Dr. Zarina Shukur

Research Interests:

Software Testing and Verification, Formal Method, Programming Education

Email : zarinashukur@ukm.edu.my

Prof. Dr. Zawiyah Mohammad Yusof

Research Interests:

Records and Information Management, Knowledge Management

Email : zawiy@ukm.edu.my

Assoc. Prof. Dr. Dalbir Singh A/L Valbir Singh

Research Interests:

Geographic Information System, Human Factor for Information System, E-Goverment

Email : dalbir@ukm.edu.my

Assoc. Prof. Dr. Jamaiah Haji Yahaya

Research Interests:

Software Quality and Certification, Software Engineering, Software Management

Email : jhy@ukm.edu.my

Assoc. Prof. Dr. Kamsuriah Ahmad

Research Interests:

Database, Conceptual Model, Information Management

Email : kamsuriah@ukm.edu.my

Assoc. Prof. Dr. Maryati Mohd Yusof

Research Interests:

Health Information Systems Evaluation, Information Systems Development, MIS, Business Process Management

Email : maryati.yusof@ukm.edu.my

Assoc. Prof. Dr. Muriati Mukhtar

Research Interests:

Value Co-Creation Methodologies, Service Science

Email : muriati@ukm.edu.my

Assoc. Prof. Dr. Noraidah Sahari @ Ashaari

Research Interests:

Empirical Information System Evaluation/Usability, E-Learning, Quality and Productivity

Email : nsa@ukm.edu.my

Assoc. Prof. Dr. Nor Azan Mat Zin

Research Interests:

Multimedia Technology for Education, E-learning

Email : azan@ukm.edu.my

Assoc. Prof. Dr. Rosilah Hassan

Research Interests:

Mobile Communication, Networking

Email : rosilah@ukm.edu.my

Assoc. Prof. Dr. Rozilawati Razali

Research Interests:

Requirements Engineering, Software Management, Empirical Software Engineering

Email : rozilawati@ukm.edu.my

Assoc. Prof. Dr. Raed Ali Helal Alsaqour

Research Interests:

Wire/Wireless network, Network Performance Modelling and Simulation

Email : raed@ukm.edu.my

Researchers

**Dr. Amirah Ismail**

Research Interests:

Multimedia Information Retrieval, Semantic Technology in E-Learning, Adaptivity for E-Learning

Email : amirahismail@ukm.edu.my

Dr. Dian Indrayani Jambari

Research Interests:

Information Systems, Business-IT Alignment, Business and IT Services

Email : dian@ukm.edu.my

**Dr. Elankovan Sundararajan**

Research Interests:

Cloud Computing, Parallel Programming, High Performance Computing

Email : elan@ukm.edu.my

Dr. Hazura Mohamed

Research Interests:

Performance Measurement, Statistical Modeling, Quality Control, Service Quality

Email : hazura.mohamed@ukm.edu.my

**Dr. Ibrahim Mohamed**

Research Interests:

Business Data Modelling, Accounting Information Systems

Email : ibrahim@ukm.edu.my

Dr. Mohd Rosmadi Mokhtar

Research Interests:

Trusted Computing, Information Security

Email : mrm@ukm.edu.my

**Dr. Noorazean Mohd Ali**

Research Interests:

Programming Paradigm, Programming Education, Software Engineering

Email : aliazean@ukm.edu.my

Dr. Nor Effendy Othman

Research Interests:

Wireless and mobile communication

Email : effendy@ukm.edu.my

**Dr. Nur Fazidah Elias**

Research Interests:

IT in Manufacturing, IS Success and Evaluation

Email : fazidah@ukm.edu.my

Dr. Ravie Chandren A/L Muniyandi

Area of Interest :

Formal Methods, Natural Computing, Programming Paradigm, Social Computing

Email : ravie@ukm.edu.my

**Dr. Rossilawati Sulaiman**

Research Interests:

Information Security, Cryptography, Multiagent System

Email : rossilawati@ukm.edu.my

Dr. Ruzzakiah Jenal

Research Interests:

Mathematical Modelling, Optimization in Scheduling, Service Delivery

Email : ruzzakiahjenal@ukm.edu.my

**Dr. Siti Fadzilah Mat Noor**

Research Interests:

E-Learning (Reusable Learning Object), Interactive Multimedia

Email : fadzilah@ukm.edu.my

Researchers

Dr. Tengku Siti Meriam Tengku Wook

Research Interests:

Interaction Design, Social Computing, Usability Evaluation, Information Visualization

Email : tsmeriam@ukm.edu.my

Dr. Zulkarnain Md. Ali

Research Interests:

Cryptography, Parallel Computing

Email : zma@ftsm.ukm.my

Dr. Yuzita Yaacob

Research Interests:

Computer Algebra

Email : yuzita@ukm.edu.my

Ms. Hana Yasmein Ishak

Research Interests:

Online Health Communities, Information Systems Development, Decision Making

Email : hana.ishak@ukm.edu.my

Dr. Zurina Muda

Research Interests:

Multimedia Semantics, Image Annotation and Retrieval, Multimedia Interactive / Game Application

Email : zurinam@ukm.edu.my

Ms. Hairulliza Mohamad Judi

Research Interests:

Simulation and Modeling , Quality Models

Email : hmj@ukm.edu.my

Ms. Hazilah Mohd Amin

Research Interests:

Information Communication Technology, Generic Skills

Email : hazilah@ukm.edu.my

Ms. Norleyza Jailani

Research Interests:

Mobile & Distributed Computing, Agent-Mediated E-Commerce, Mobile Agent Security

Email : njailani@ukm.edu.my

Ms. Marini Abu Bakar

Research Interests:

Computation and Graphics Programming, Programming Education

Email : marini@ukm.edu.my

Ms. Siti Aishah Hanawi

Research Interests:

Statistical Modeling & Analysis Service, Service Quality

Email : ctaishah@ukm.edu.my

Ms. Rodziah Latih

Research Interests:

End User Programming, Programming Education

Email : rodziah@ftsm.ukm.my

Ms. Zuraidah Abdullah

Research Interests:

Digital Library , Knowledge Management

Email : zuraidahabdullah@ukm.edu.my

Ms. Umi Asma Mokhtar

Research Interests:

Electronic Records & Information Management, Knowledge Management

Email : umimokhtar@ukm.edu.my
